SUMMARY

Full-Stack Software Engineer with 3+ years of experience building AI-powered enterprise applications at IBM using Java, React, TypeScript, and REST APIs. Delivered production GenAI features, improved CI/CD pipelines, and built scalable workflow automation solutions.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, Shell Scripting

Frameworks & Technologies: React, REST APIs, HTML, CSS

Cloud & DevOps: Git, Jenkins, CI/CD, Bash

Testing: JUnit, Pytest, Selenium

Enterprise & AI: IBM Business Automation Workflow (BAW), IBM Cloud Pak for Business Automation (CP4BA), Watsonx.ai

WORK EXPERIENCE

IBM Canada Ltd

Software Engineer

August 2024 - Present

Markham, Ontario, Canada

- Engineered and delivered the **GenAI** workflow component for IBM Business Automation Workflow (BAW), integrating **Watsonx.ai** via REST APIs to enable AI-powered automation and reduce manual effort by **80%+**
- Developed support for **Watsonx.ai** foundation models and custom/deploy-on-demand LLMs through backend API routing and frontend model selection
- Led migration of my team's **Jenkins CI/CD** pipelines to IBM Secure Pipeline Services (SPS), ensuring reliable deployments, maintaining **100%** upgrade compatibility, and improving pipeline stability
- Diagnosed and resolved high-priority production issues across **Java** and **JavaScript** services in IBM Business Automation Workflow (BAW) and Cloud Pak for Business Automation (CP4BA), improving system stability
- Maintained **Selenium** regression test suites, sustaining a **90%+** pass rate across workflow authoring environments

IBM Canada Ltd

Front End Developer Intern

May 2022 - April 2024

Markham, Ontario, Canada

- Implemented a secure **DB2-backed** data migration flow enabling seamless user upgrades to new CP4BA versions with **zero** data loss and minimal downtime
- Enhanced CP4BA workflow authoring by modernizing BPMN diagrams and implementing dynamic grid-based UI layouts using IBM Carbon Design, **React**, and JavaScript
- Led integration of an external PDF generation service into CP4BA, enabling UI-to-PDF export through implementation, client demonstrations, and technical documentation

McMaster University

Undergraduate Teaching Assistant

Sept 2021 - Dec 2021

Hamilton, Ontario, Canada

- Automated grading for **25+** students by writing Python scripts to generate and run test cases, streamlining assessment and reducing manual effort
- Led weekly Python labs for **5+** students, providing hands-on coding instruction and debugging support

PROJECTS

BEATLab McMaster University

Research Software Developer

September 2023 - April 2024

Hamilton, Ontario, Canada

- Designed and developed a capstone project integrating third-party eye-tracking glasses with **Python**, **Kafka**, and **React** to enable homography projection, utilizing deep learning and computer vision for precise data analysis
- Integrated eye-tracking solutions into lab procedures, contributing to data collection and a CHI 2025 paper (DOI)

Game 2048

github.com/Mehak-Khan/Game2048

- Developed a GUI-based 2048 game in Java, implementing the MVC design pattern for modularity and maintainability

EDUCATION

Bachelor of Software Engineering, McMaster University

April 2024

GPA: 4.00/4.00 Dean's Honour List
